

North West Bio-Energy Ltd. Produces First Ethanol

A beautiful "Eastern" sunrise over the North West Bio-Energy ethanol plant as production begins on Aug. 27th.

NORTH WEST BIO-ENERGY LTD. SHIPS FIRST LOAD OF ETHANOL

The first load of denatured ethanol (50,000 litres) left for Saskatoon September 1st. This marks an important milestone for the ethanol project as we are now producing and shipping product. By next week, people in Saskatchewan will be powering their vehicles on North West Bio-Energy ethanol.
