

GRADE 7 STUDENTS FROM UCHS LEARN ABOUT ETHANOL.

Grade 7 students from UCHS under the direction of teacher Kory Skinner are learning about renewable fuels. They decided to focus on Ethanol because of their close proximity to North West Bio-Energy Ltd. On Friday, May 29th Raj Tyagi, the operations manager for NWBE gave a one hour classroom presentation to the students. On Monday, June 8th Jason Skinner, CEO of North West Terminal Ltd. gave the class a tour of the Ethanol Facility. The students were amazed at the tremendous size of the tanks and equipment in the building.
