NEWS RELEASE

For immediate release.....January 18, 2018

NWT COMPLETES CONSTRUCTION OF NEW MCC BUILDING

The Board of Directors of North West Terminal Ltd. (NWT) is pleased to announce the completion of construction of a new 3,000 Amperage Motor Control Centre (MCC) - complete with Power Factor Correction (PFC) - at its Unity Saskatchewan location. The MCC is designed to: 1) supply power to NWT's existing grain handling facility through its two existing MCC rooms; 2) supply power to a new high-capacity grain dryer that is nearing completion; and 3) meet the company's potential needs for expansion in the future.

Commissioning of the project occurred on January 12, 2018 when power was connected to the new MCC. The total cost of the project to date including materials, labour and equipment is \$695,525. Management expects the power savings from the PFC equipment installed in the new MCC to approach \$5,000 per month or \$60,000 per year.

"The Board of Directors is very pleased with the new electrical works at NWT," says NWT's President Brad Sperle. "The amount of space and the availability of electricity is an important consideration when new projects are being planned. The new MCC will allow the company to expand the facility at less cost and better serve its farmer-customers for years to come. In addition, the PFC equipment will improve efficiency and reduce costs. A win-win!" Sperle farms near Unity, Saskatchewan.

NWT is an independent farmer-shareholder owned company headquartered near Unity, Saskatchewan in the North West region of the province. NWT owns and operates both an inland-grain terminal and a bio-products manufacturing facility at its Unity location. NWT is also a minority owner of Alliance Seed Corp. (ASC) in Saskatoon, Saskatchewan and Alliance Grain Terminal Ltd. (AGT) in Vancouver, British Columbia.
